

# HELLO! 😊

---

## **INSTRUCTIONS:**

Print out these pages and color! Easy as that! Once you've colored your paper doll and her outfits, use scissors or an Exacto knife to cut out all pieces. Cut the black vertical line at the bottom of the paper doll and use the half-moon piece to slide in the slit at the bottom of the doll. This will help the doll to stand up and show off her fabulous outfits. 😊

## **SUGGESTIONS:**

- I suggest printing the doll page on a heavier paper. Cardstock is a great option or you can print out the doll on regular printer paper and glue it onto a heavier paper such as cardstock if you can't print on a heavier paper.
- You can color your doll with almost anything. The only material that may not work well is watercolor or gouache. However, if you print out the doll on a watercolor-friendly paper then problem solved! 😊

***THANK YOU SO MUCH!*** 😊

I'd love to see how you style Cher! Tag me, @lbprojectprint, on social media with your creations and I will share your designs on my page! Thank you so much for downloading my paper doll and visiting my site! I hope you have a great time putting Cher together and keep your eye out of more paper doll ladies!
